Profile of the speaker

Scott Tremaine is the Richard Black Professor at the Institute for Advanced Study (IAS), Princeton.

He received his Ph.D from Princeton University and held appointments at Caltech, Cambridge and MIT.

He was the founding Director of the Canadian Institute for Theoretical Astrophysics (CITA) and formerly served as the Chair of the Department of Astrophysical Sciences at Princeton University.

He is the recipient of numerous awards, including the Dannie Heinemann Prize for Astrophysics (1997) awarded by the American Astronomical Society (AAS) and the Rutherford Medal (1990) by the Royal Society of Canada.

The asteroid 3806 Tremaine is named after him.

Tremaine is also credited with coining the name for the Kuiper Belt.

He is the co-author of the «Galactic Dynamics» textbook published by Princeton University Press.
