

CSH Lunch Seminars: Frühjahrssemester 2017

Thursday, 12.15-13.00, **NEW ROOM: Meeting room -108, G6 building**, Gesellschaftsstrasse 6, 3012, Bern

- 23.02.2017** Dr. **Yamila Miguel** (Observatoire de la Côte d'Azur)
Jupiter internal structure and the Juno mission
- 2.03.2017** Dr. **Andrea Loettgers** (CSH)
What Are Definitions of Life Good For?
- 9.03.2017** Dr. **Mihkel Kama** (University of Cambridge)
Elemental abundances in disks and giant planets
- 16.03.2017** Dr. **Gabriel-Dominique Marleau** (Space, University of Bern)
The Planetary Accretion Shock
- 23.03.2017** **CANCELLED**
- 30.03.2017** Dr. **Daniel Angerhausen** (CSH)
Sniffing Alien Atmospheres: Exoplanet spectrophotometry
- 6.04.2017** Dr. **Paul Rimmer** (University of Cambridge)
Liquid Water's Not Enough: Prebiotic Chemistry Requires a Narrower Range of Temperatures
- 13.04.2017** Dr. **Eric Hébrard** (University of Exeter)
Some like it hot, some like it cold : chemical modeling of (exo)planetary atmospheres
- 27.04.2017** Dr. **Lars Kristensen** (University of Copenhagen)
Following the water trail from pre-stellar cores to disks and planets
- 4.05.2017** Dr. **Sebastian Daemgen** (Institute for Astronomy, ETH Zürich)
Exoplanets in binary stars: Observations & Implications
- 11.05.2017** Dr. **Monika Lendl** (Austrian Academy of Sciences, Graz)
CHEWIE: a ground-based survey of hot Jupiter atmospheres
- 18.05.2017** Dr. **Audrey Coutens** (University College London)
Complex organic chemistry in star-forming regions
- 1.06.2017** Dr. **Emeline Bolmont** (University of Bordeaux)
Water loss from the terrestrial planets orbiting TRAPPIST-1 and Proxima-b
- 15.6.2017** **Tim Lichtenberg** (Institute for Astronomy, ETH Zürich)
A thermomechanical 'Goldilocks' regime' for impact splash chondrule formation
